

SECRET  
SECURITY INFORMATION

EUCA-52-537

Chief, BOB

28 March 1952

Chief, EUCA

Operational

Final Commo Briefings, BOB PASTIME Agents

REFERENCE: EUCA-52-142

RECEIVED  
MAR 29 1952  
201  
27 MAY 1952

1. Communications training of the following BOB W/T Agents has progressed to the point that they are considered to be capable of operating an Agent W/T circuit:

- a. CALAMUS 2A
- b. CAPSULE 28I
- c. CATARACT 2
- d. CATTY 4

2. It is recommended that Final Commo Briefings be held for, and Commo material be made available to, the above Agents in each case where operational considerations permit. This is necessary if these W/T Agents are to be of potential value in the event of a withdrawal of U. S. Forces from Berlin. Signal plans, cipher materials, and W/T equipment are on hand for each of the Agents mentioned above.

3. One of the more important subjects covered during the Final Commo Briefing is that of W/T Agent activation; you are referred to dispatch EUCA-52-142 for a detailed discussion of this subject.

4. Refresher W/T training should be continued after the Final Commo Briefing has been accomplished, to ensure that the Agent continues to improve his ability - or at least remains at a satisfactory level of proficiency as a W/T operator.
